Rodrigue Govan

PhD Student in Computer Science

Noumea, New Caledonia

March, 7th 1996

Driving licence

+687 94 59 10
+33 (0) 6 72 32 86 78

rodrigue.govan@unc.nc
rodrigue.govan@gmail.com

in/rodrigueg

Skills

Computer Science

- Python, R/RStudio, Matlab, SQL, PostGreSQL, Linux, QGIS, HTML/CSS, PHP.

Language

- French (fluent)
- English (fluent)
  TOEIC (April 2018) : 820/990 points
- Vietnamese (mother tongue)

IMB, University of Bordeaux, France

Professional Background

Fixed-Term Contract – Data Scientist

Institute of Exact and Applied Sciences, University of New Caledona
2020 – September to December

- Analysis of natural water quality data in New Caledonia.
- Contribution to research paper writing.
- Environment : Python (sklearn, statsmodels, plotly, Jupyter), QGIS, Access, PostGreSQL.

Internship – Data Scientist

IDAIA Group, Bordeaux, France
2019 – February to August

- Use of Deep Learning for object detection on satellite images.
- Environment : Python (sklearn, Tensorflow, PyTorch, plotly, Jupyter), QGIS, Linux.

Academic Background

Doctorate – Computer Science

Institute of Exact and Applied Sciences, University of New Caledonia
Since October 2021

- Title : « Evolving and Dynamic Attributed Graphs: Application to the risk mapping of Leptospirosis in New Caledonia ».
- Under the supervision of Pr. Nazha Selmaoui-Folcher and Pr. Philippe Fournier-Viger.

Master Degree – Applied Mathematics and Statistics

University of Bordeaux, France
2017 – 2019

- Minor Statistic and Stochastic Modelling.

Bachelor Degree – Applied Mathematics and Computer Science

University of Bordeaux, France
2014 – 2017

- Minor Business Administration.

Projects

Hackathon (CASSINI.eu)

University of New Caledonia / L2K Innovation
2021 – June

- European entrepreneurship-oriented Hackathon.
- Final ranking: 1st in France, 3rd in Europe.

BigData Project (Airbus Defence and Space)

INSA Toulouse / University of Bordeaux, France
2019 – October to December

- Contest between multiple schools.
- Subject : Use of Deep Learning for the classification of satellites images containing wind turbines.
- Final ranking: 7th/64.

Communications

April 2023 — Scientific research at the service of data.
Oral communication. Meetup « data ». *ISI.nc – OoTech*

November 2022 — Popularizing science (Speed-Searching).
Oral communication. Science Fair. *University of New Caledonia*

September 2022 — Evolving and Dynamic Attributed Graphs: Application to the risk mapping of Leptospirosis in New Caledonia.
Poster. Doctoriales. *Pacific Doctoral School (ED469)*
